LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Computer Science undergraduate and Frontend/Full-Stack Developer with production experience building React.js dashboards, RESTful APIs, and GenAI-powered applications using the Claude API. Shipped a real-time LLM streaming pipeline (DesignIQ) and a production-deployed MERN platform with role-based access control. 360+ LeetCode problems solved. Strong communicator with a track record of shipping on schedule in Agile teams.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, C++, SQL
- **Frontend / Backend:** React.js, HTML5/CSS3, Tailwind CSS, Node.js, Express.js, FastAPI, REST APIs, JWT, RBAC, Microservices
- **Databases & Cloud:** MongoDB, MySQL, Schema Design, Query Optimization, Indexing, AWS, Docker, CI/CD (Vercel)
- **Gen AI & ML:** Claude API, Gemini API, Prompt Engineering, RAG/Vector Search, LLM Integration, scikit-learn, pandas, NumPy
- **Core CS:** Data Structures & Algorithms (360+ LeetCode), System Design, OOP, Computer Networks, DBMS
- **Professional Skills:** Communication, Teamwork, Problem Solving, Agile/Scrum

PROFESSIONAL EXPERIENCE

Springer Capital — Frontend Developer Intern *Jul 2025 – Sep 2025*

- Built 5+ responsive React.js dashboards to visualize real-time client financial metrics, improving reporting efficiency by 22% and reducing manual export requests.
- Integrated 8+ RESTful API endpoints with backend engineers, defining API contracts, schemas, and error-handling strategies for consistent data flow.
- Containerized the frontend app with Docker, reducing environment setup time by ~40% across a 6-member dev team.
- Collaborated in 2-week Agile sprints, standups, and peer code reviews, shipping features on schedule across 3 release cycles.

PROJECTS

DesignIQ — AI-Powered System Design Platform *React.js, Node.js, MongoDB, Claude API*

- Engineered a real-time token-streaming pipeline using the Claude API to convert natural language prompts into system architecture diagrams, achieving sub-300ms first-token response time.
- Implemented multi-turn LLM conversation flow with context persistence, secured sessions with JWT auth, and persisted versioned design history in MongoDB.

DocuMind — AI Document Q&A (RAG) Assistant *React.js, FastAPI, Claude API, Vector DB*

- Built a retrieval-augmented Q&A tool: uploaded PDFs are chunked and embedded into a vector store (Chroma/FAISS), then queried in natural language with the Claude API generating answers grounded in the source document.
- Added inline source citations to reduce hallucinated answers, and a chat-history layer in MongoDB for multi-turn follow-up questions.

Nexi-Tasker — Task Management Platform *React.js, Node.js, Express.js, MongoDB, Vercel*

- Built a production-deployed MERN app with full CRUD task management, JWT auth, and granular role-based access control (admin/member/viewer).
- Designed a normalized MongoDB schema and RESTful APIs; configured an automated CI/CD pipeline on Vercel for zero-downtime deployments.

EDUCATION

SRM Institute of Science and Technology, Chennai, TN *2023 – Present*

B.Tech in Computer Science & Engineering

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Machine Learning, Web Technologies, OOP, Computer Networks

ACHIEVEMENTS & CERTIFICATIONS

- LeetCode: 360+ problems solved across Arrays, Trees, Dynamic Programming, and Graph algorithms.
- 3rd Place, Cloudathon Coding Competition, SRM IST — built a real-time collaborative coding platform in 24 hours.
- Top 10 Finalist, Nexathon Hackathon, SRM IST (200+ teams) — developed an AI-powered campus resource allocation system.
- Machine Learning A-Z — Udemy (2024) | Full Stack MERN Developer — Udemy (2024)
